

Bikes To Go

Bikes to Go wanted to transition their website from a Wix-based platform to WordPress for improved performance and scalability. They sought to preserve the existing design while leveraging more modern tools to enhance speed and user experience. Time was a critical factor, as the client needed the new site completed quickly and with minimal disruption to their business operations.

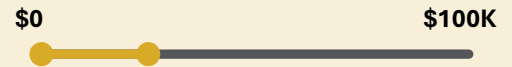

Business Challenge

Bikes to Go wanted to transition their website from a Wix-based platform to WordPress for improved performance and scalability. They sought to preserve the existing design while leveraging more modern tools to enhance speed and user experience. Time was a critical factor, as the client needed the new site completed quickly and with minimal disruption to their business operations.

Our Solution

Imagi-tech provided professional WordPress development expertise to rebuild the Bikes to Go website efficiently. Using an optimized WordPress theme, we recreated their existing design with modern tools, ensuring a seamless transition without compromising on the look and feel. Our process prioritized user experience, with careful attention to desktop and mobile navigation to make interactions smooth and intuitive. The entire project was managed end-to-end, eliminating stress for the client while ensuring a fast and reliable delivery.

Results

Quick Turnaround

The new Bikes to Go website was rebuilt and delivered for client feedback in a short timeframe.

Seamless Transition

Once approved, Imagi-tech managed the go-live process, including migrating DNS records off Wix to spin down their previous service.

Improved Performance

The WordPress-based site is fast, efficient, and easy to update, providing a better experience for both the client and their users.

With a focus on speed, simplicity, and seamless execution, Imagi-tech partnered with Bikes to Go to deliver a modernized website that supports their business goals while maintaining their current design.
